

## **PROGRAM OUTCOME:**

- **PO 1: ENGINEERING KNOWLEDGE:** Apply the knowledge of mathematics, science, engineering fundamentals, and an Engineering specialization to the solution of complex engineering problems.
- **PO 2: PROBLEM ANALYSIS:** Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **PO 3: DESIGN / DEVELOPMENT OF SOLUTIONS:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the Public health and safety, and the cultural, societal, and environmental considerations.
- **PO 4: CONDUCT INVESTIGATIONS OF COMPLEX PROBLEMS:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **PO 5: MODERN TOOL USAGE:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering Activities with an understanding of the limitations.
- **PO 6: THE ENGINEER AND SOCIETY:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the Professional engineering practice.
- **PO 7: ENVIRONMENT AND SUSTAINABILITY:** Understand the impact of the professional engineering Solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- **PO 8: ETHICS:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **PO 9: INDIVIDUAL AND TEAMWORK:** Function effectively as an individual, and as a member or leader in diverse teams, and in multi-disciplinary settings.
- **PO 10: COMMUNICATION:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- **PO 11: PROJECT MANAGEMENT AND FINANCE:** Demonstrate knowledge and understanding of the engineering and Management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multi-disciplinary environments.
- **PO 12: LIFE-LONG LEARNING:** Recognize the need for, and have the preparation and ability to engage in Independent and life-Long learning in the broadest context of technological change.

## **PROGRAMME SPECIFIC OUTCOMES ( PSO's) OF CSE DEPARTMENT:**

***PSO 1: Ability to apply knowledge in Computing and Research:*** Ability to find out the appropriate domain specific unexplored research area based on the academic knowledge and to apply, enhance and use acquired knowledge in various domain in the field of computer science & engineering.

***PSO 2: Gain elementary ideas in Software and Hardware Engineering:*** Ability to design and develop the interfacing between software and hardware in emerging technology like embedded system in real-time system applications, Cloud computing, Machine Learning etc.

***PSO 3: Foundation of Mathematical concepts:*** Acquire ability to apply mathematical methodologies to solve several application oriented computation task, real world problems and create a scientific model in the field of human genome, statistical data gathering, Data science engineering and many more.
