

About the Faculty Development Program (FDP)

The FDP is intended to provide participants with a comprehensive understanding of a variety of AI/ML-based issues in electrical energy systems and to enhance their ability to use advanced tools and techniques to measure power system parameters. Understanding cybersecurity, power system operation and application, and microgrid application on renewable energy sources are all part of the FDP.

In addition, the FDP will acquire knowledge regarding cybersecurity threats in electrical power systems and the methodology for implementing these standards in real-world scenarios to enhance system reliability and ensure conformance. The skill to recognize, evaluate, and resolve power system issues will also be acquired by participants, which will improve their capacity to instruct these ideas. Participants will be encouraged to take part in renewable energy-related research and development projects by the FDP.

About Us

ABOUT THE INSTITUTE

Established in 2006, the Dream Institute of Technology, Kolkata, is a premier engineering college affiliated with MAKAUT and approved by AICTE. It offers accredited courses and committed towards holistic development of a student. It nurtures skilled professionals through dedicated faculty, modern facilities, and a focus on ethics. With advanced labs and resources, DIT ensures a vibrant learning experience, reflecting its commitment to excellence.

ABOUT THE DEPARTMENT

Since 2006, we've empowered aspiring electrical engineers through innovation and academic excellence. Our experienced faculty ensures a practical approach, preparing graduates for success. With cutting-edge labs and NBA accreditation, we shape future-ready professionals.

About the FDP (ETPE-2024)

The Department of Electrical Engineering, Dream Institute of Technology is organizing Five days National Level Online Mode Faculty Development Program on “**Emerging Technologies in Power Energy: Shaping the Future of Sustainable Solutions (ETPE-2024)**”. The Course is designed for AICTE approved Faculty Members (Polytechnics, Engineering Colleges/Institutions), Industry Delegates from public/private organizations with minimum qualification of Bachelor’s Degree in any branch of Engineering/ or its equivalent, PG students and Ph.D./Research Scholars. The course has been designed to cover theoretical concepts in the areas of Power systems, AI/ML Integration of power systems in renewable energy sources, cyber physical systems & design of switching converters etc. along with the tools and simulators useful for the participants for their Training, different Projects and Research Work etc.

Contents of the Course

The Course provides in-depth coverage on possibly few of the following areas:

- **Machine learning techniques in power energy**
- **Converters modelling and its implementation in Renewable technologies.**
- **Concepts of Grid Integration of Renewable Energy Resources.**
- **Concepts of Artificial Intelligence in Control Systems**
- **Perceptions of Cyber Physical Systems (CPS)**
- **Optoelectronic emitters and detectors Concepts.**

rcert college: hank you very much to organizing the FDP

02:07:32.984,02:07:35.984

SAGAR MANTHRI: Thank you, Dream Institute of Technology!

02:07:36.554,02:07:39.554

jellar rehman: Highly informative 5 days fdp programme sir

02:08:01.694,02:08:04.694

Vengadesan A: feedback link sir

02:10:28.588,02:10:31.588

Mr.Venkateshkumar Assistant Professor - 2750: Thank you sir

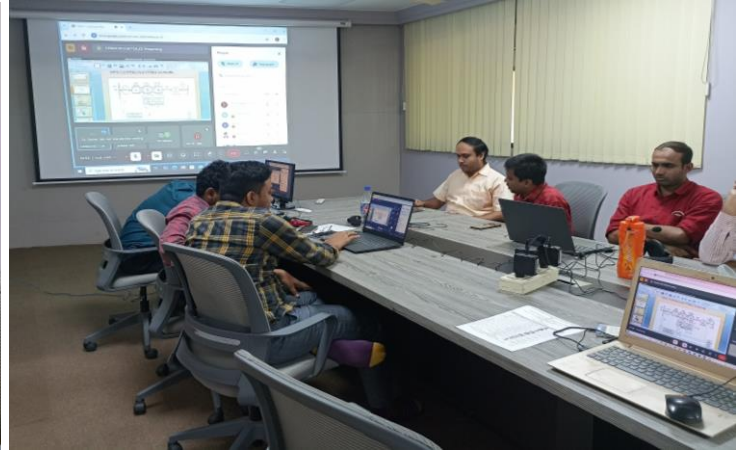

02:10:29.792,02:10:32.792

Rathi Devi P: Thank you very much for the speakers and the organizers.

FDP Outcomes

The Faculty Development Program was designed in such a way that, everyone should understand the basic concepts of Power energy, sustainable development in a renewable in nature.

- ✓ The FDP was figure out the concepts of Modeling of dc-dc Switching Converter like, Boost Converter, Tri-state Boost Converter, Interleaved Boost Converter & Tri-state Interleaved Boost Converter with their application and overall set up and also shown their simulated and experimental results.
- ✓ The FDP also pointed out the Concept of Microgrid, New trends in power electronics for the integration of wind and photovoltaic, concept of Hybrid Generation and some storage-system technology. Sir also given the idea of Grid Codes for Power Quality, concepts of Doubly Fed Induction Generators, Self-excited induction generator etc.
- ✓ For further study and tell us some research topics like, MPPT control, Total Harmonic Distortion (THD) improvements & reduction of current or voltage ripple.
- ✓ The FDP was also clearing the ideas for Machine learning application in power and energy sector. In view of resiliency enhancement in cyber physical system, Centralized, decentralized and distributed control framework are needed.
- ✓ Also, there are some Artificial neural network, Radial basis neutral network, adaptive Non-linear sliding mode control law and lastly Fractional order calculus etc. are discussed in the FDP.
- ✓ Lastly, the FDP was clears the idea for UV VIS LED & UV Photo Detector, III Nitride material system (device operation, Research status & its problems and opportunities), some research activity of Light Emitting diode.
